EDUCATION & CERTIFICATIONS

Bachelor in Computer Science and Engineering	2025 - 2029
<i>Faculty of Automatic Control and Computer Science, Politehnica Bucharest</i>	
Erasmus+ Exchange Student in Computer Science	2026 - 2027
<i>Technische Universität Darmstadt, Germany - Focus: Systems, Networking & AI/ML</i>	
Languages - Romanian (Native), English (C1), German (A1)	
Machine Learning Security & Privacy Summer School - ACS UNSTPB	2026
Network Security and Design Summer School (CCNA 1, 2 & 3) - ACS UNSTPB	2026
Fortinet NSE 4 Certification (FortiOS) - Fortinet / NSDSS Partner Program	2026

WORK EXPERIENCE

Commission Member - AcadNET National Olympiad	Apr 2026 - May 2026
<i>Union of Romanian Informatics Teachers (U.T.I.R.) + Hackademy Bucharest, Romania</i>	
– Collaborated with senior volunteers to construct and test exam subjects for the practical Linux / Computers section	
– Supervised live contest execution for 100 participants , managed infrastructure, and graded submissions	
Cisco Certified Network Associate instructor - @hackademy	Oct 2025 - Jan 2026
<i>ACS UNSTPB Bucharest, Romania</i>	
– Taught CCNA1 certified networking courses to 35 students with a 95% passing rate	
– Developed course curriculums, proposed exam subjects, and organized activities in a collaborative environment	

HONORS AND AWARDS

1st Place - Network Security and Design Hackathon (CiscoGate)	2026
Bronze Medal - National Olympiad of Applied Informatics “ AcadNET ” (Linux)	2025
Mention - National Olympiad of Applied Informatics “ AcadNET ” (Linux)	2024

VOLUNTEERING

Hackademy	Oct 2025 - Jun 2026
<i>Junior Instructor ACS UNSTPB</i>	
– Supervised and managed the organization of projects and events attended by 50+ students	
– Showed initiative, offering aid in urgent situations and solving core issues	
Linux Install Fest	Oct 2025
<i>Systems Setup Volunteer ACS UNSTPB</i>	
– Assisted students and introduced them into the world of Linux and Open-Source Software	
– Provided one-to-one assistance in setting up personalized computing environments	

PROJECTS

Media Server	Nov 2023 - Present
<i>Deployment of a self-hosted and self-managed scalable media platform phanter.site/jellyfin</i>	
– Deployed and maintained a scalable self-hosted platform from the hardware layer up , optimized for low-level performance	
– Configured GPU-accelerated hardware transcoding and scaled resources to support 20+ concurrent users	
Open Source Contributor @ CDL/ROSEdu - Unikraft Microkernel	May 2026
<i>Upgrading container infrastructure and restoring legacy documentation for cloud native microkernel github.com/unikraft/unikraft (3.7k ★)</i>	
– Refactored Docker with named volumes to cache node_modules , speeding up builds and fixing dependencies	
– Modernized technical documentation by extracting and adapting architectural insights from historical git commits	
CiscoGate	Jul 2026 - Present
<i>Unified network console with LLM-powered syntax translation and SSH proxy github.com/ericsandu/CiscoGate</i>	
– Engineered a real-time full-stack interface (React , FastAPI) for unified multi-vendor management	
– Implemented Zero-Knowledge Translation via AES-GCM, applying prior E2EE concepts to secure payloads	
Moonslate	Aug 2026 - Present
<i>High-performance cross-platform offline Live Speech-to-Speech Translation engine built in C++ github.com/ericsandu/moonslate</i>	
– Architected a multithreaded Qt6/C++ pipeline integrating STT, MT, and TTS neural networks	
– Optimized DSP execution to achieve real-time sub-500ms translation latency on consumer hardware	

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, x86 ASM, Bash, HTML/CSS, L^AT_EX
Frameworks & Tools: React, Vite, FastAPI, Qt6, CMake, WebSockets, Git, GitHub Actions
AI & ML: Large Language Models (LLMs), STT/TTS Pipelines, Neural Networks, Data Analysis
Networking & Sys: Linux, BSD, Cisco IOS, FortiOS (NSE 4), Routing/Switching, OSPF, VLANs, VPN, QoS
Infra & DevOps: QEMU, KVM, Docker, ZFS, Nginx/Caddy, SQLite, MariaDB
