phanter.site

Computer Science student and open-source contributor with a strong focus on systems engineering, low-level performance optimization, and network infrastructure.

Languages: English (C1), German (A1), Romanian (Native)

Education & Certifications

Bachelor in Computer Science and Engineering *2025 – 2029*
*Faculty of **Automatic Control** and **Computer Science**, Politehnica Bucharest, Romania*

Erasmus+ Exchange Student in Computer Science *2026 – 2027*
Technische Universität Darmstadt, Germany – Focus: Systems, Networking, AI/ML

Summer Schools @ UPB: Network Security & Design (CCNA) | ML Security & Privacy *Jul 2026*

Certifications: Fortinet NSE 4 (FortiOS) | AWS Certified Cloud Practitioner *Oct 2026*

Work Experience

Commission Member – AcadNET National Olympiad *Apr 2026 – May 2026*
Union of Romanian Informatics Teachers (U.T.I.R.) + Hackademy – Bucharest, Romania
- Collaborated with senior volunteers to construct and test exam subjects for the practical **Linux / Computers section**
- Supervised live contest execution for **100 participants**, managed infrastructure, and graded submissions

Cisco Certified Network Associate Instructor *Oct 2025 – Jan 2026*
Hackademy – Bucharest, Romania
- Taught **CCNA1 certified** networking courses to **35 students** with a **95% passing rate**
- Developed course curriculums, proposed exam subjects, and **organized** activities in a collaborative environment

Honors and Awards

Network Security & Design Hackathon – 1st Place Winner (Project: CiscoGate) *Jul 2026*

AcadNET National Informatics Olympiad – Bronze Medal (Linux Section) *May 2025*

Lider@5 Public Speaking Competition – Special Mention *Dec 2022*

Volunteering

Junior Instructor *Oct 2025 – Jun 2026*
Hackademy – Bucharest, Romania
- **Supervised** and **managed** the organization of projects and events attended by **50+ students**
- Showed initiative, offering **aid in urgent situations** and solving core issues

Systems Setup Volunteer *Oct 2025*
Linux Install Fest – Bucharest, Romania
- Assisted students and introduced them into the world of **Linux** and **Open-Source Software**
- Provided **one-to-one assistance** in setting up **personalized computing environments**

Projects

Media Server *Nov 2023 – Present*
Deployment of a self-hosted and self-managed scalable media platform
phanter.site/jellyfin
- Deployed and maintained a scalable self-hosted platform from the **hardware layer up**, optimized for **low-level performance**
- Configured **GPU-accelerated hardware transcoding** and scaled resources to support **20+ concurrent users**

Open Source Contributor @ CDL/ROSEdu – Unikraft Microkernel *May 2026*
Upgrading container infrastructure and restoring legacy documentation for cloud native microkernel
github.com/unikraft/unikraft (3.7k ★)
- Refactored **Docker** with named volumes to cache `node_modules`, speeding up builds and fixing dependencies
- **Modernized** technical documentation by extracting and adapting architectural insights from **historical git commits**

CiscoGate *Jul 2026*
Unified network console with LLM-powered syntax translation and SSH proxy
github.com/ericsandu/CiscoGate
- Engineered a real-time full-stack interface (**React, FastAPI**) for unified multi-vendor management
- Implemented **Zero-Knowledge Translation** via AES-GCM, applying prior E2EE concepts to secure payloads

Moonslate *Aug 2026*
High-performance cross-platform offline Live Speech-to-Speech Translation engine built in C++
github.com/ericsandu/moonslate
- Architected a multithreaded **Qt6/C++** pipeline integrating STT, MT, and TTS neural networks
- Optimized DSP execution to achieve **real-time sub-500ms translation latency** on consumer hardware

Technical Skills

Languages: C, C++, Python, JavaScript, x86 ASM, Bash, HTML/CSS, LaTeX
Frameworks & Tools: React, Vite, FastAPI, Qt6, CMake, WebSockets, Git, GitHub Actions
AI & ML: Large Language Models (LLMs), STT/TTS Pipelines, Neural Networks, Data Analysis
Networking & Sys: Linux, BSD, Cisco IOS, FortiOS (NSE 4), Routing/Switching, OSPF, VLANs, VPN, QoS
Infra & DevOps: AWS (VPC, EC2, S3, IAM), Docker, QEMU, KVM, ZFS, Nginx/Caddy, SQLite, MariaDB
